Subject: US EPA Information Request Extension

Good morning Linda –

This email is confirming our phone conversation yesterday (8/13/13). US EPA has granted Heritage Thermal Services (HTS) a two week extension on the Information Request Pursuant to the Clean Air act. HTS received this request on August 8, 2013. Per the request, HTS must provide the requested information within two weeks of receipt date, which would be August 22, 2013. The two week extension has moved that deadline to September 5, 2013.

HTS appreciates the US EPA working with us on this issue.
Sincerely,

Carrie L. Beringer
Environmental, Health, & Safety Manager
